Professional Summary

Full Stack Developer and founder with hands-on experience building and deploying **production web applications, REST APIs, AI-powered applications, and automation workflows**. Strong in **Python, FastAPI, React, Next.js, Node.js, SQL, and LLM API integration**. Experienced with **OpenAI and Claude APIs**, AI-assisted development, prompt engineering, API integration, debugging, performance optimization, and end-to-end product delivery. Built and deployed multiple live applications while working across frontend, backend, AI, databases, and production deployment.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, HTML5, CSS3

Backend: FastAPI, Python, Node.js, Express.js, REST APIs, API Integration, Middleware, Request/Response Handling

Frontend: React.js, Next.js, Tailwind CSS, Framer Motion, GSAP, Three.js, Responsive UI

AI Engineering: OpenAI API, Claude API, LLM Integration, Prompt Engineering, AI Workflows, LLM Applications, AI Automation, Structured Prompting, NLP, Embeddings

Machine Learning: scikit-learn, TF-IDF, LSTM, ARIMA, Random Forest, Sentiment Analysis, Feature Engineering

Databases: SQL, MongoDB, Relational Database Design, Query Optimization, Data Modeling

Development & Deployment: Git, GitHub, Vercel, Postman, VS Code, Jupyter Notebook, CI/CD Concepts, Production Debugging

AI-Assisted Development: Cursor, Claude Code, Antigravity, OpenRouter, AI-Assisted Coding, Prompt-Based Development

Computer Science: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Cloud Computing, IoT, Software Engineering

Experience

Founder & Full Stack Developer

DeepCipher Studio

Jan 2026 – Present

Bengaluru, India

- Founded and operate a web development studio delivering **production websites and digital products** for businesses across Karnataka.
- Built and shipped multiple live applications using **Next.js, React.js, Tailwind CSS, Node.js, Framer Motion, and GSAP**, owning development from requirements gathering through production deployment.
- Integrated **OpenAI and Claude APIs** into applications for AI-powered generation, personalized workflows, and automated content generation.
- Designed reusable frontend components and scalable application structures, reducing repeated implementation across multiple client projects.
- Managed the complete development lifecycle including **requirements, architecture, implementation, API integration, debugging, deployment, performance optimization, and maintenance**.
- Built responsive, mobile-first applications and implemented SEO, asset optimization, Core Web Vitals, and production performance improvements.
- Used **Git, GitHub, Vercel, Postman, Cursor, Claude Code, and AI-assisted development workflows** throughout product development and deployment.

Data Science Intern – NLP & Sentiment Analysis

Proxenix

Jan 2026 – Mar 2026

Remote

- Built and evaluated an NLP sentiment classification pipeline using **Python, TF-IDF, pandas, and scikit-learn**.
- Performed data preprocessing, feature engineering, model evaluation, and benchmarking on real-world movie review datasets.
- Developed **CinePulse**, an end-to-end sentiment analysis platform exposing machine learning inference through application APIs.

Full Stack Developer Intern

Government Tool Room & Training Centre (GTTC)

Feb 2023 – Jun 2023

Hubli, Karnataka

- Developed responsive web interfaces and **RESTful APIs** for application workflows and client-server communication.
- Optimized SQL queries and relational database structures, improving data retrieval performance by over **30%**.
- Performed API testing, debugging, and validation using **Postman** and collaborated through Git-based development workflows.

Selected Projects

AI Outreach Automation Platform | *Next.js, OpenAI GPT-4 API, LLM Automation, API Integration* Live

- Built an AI-powered outreach automation platform using **Next.js** and **GPT-4 API** to generate personalized emails from recipient information and user-defined instructions.
- Designed an automated workflow that transformed recipient context into personalized outreach content while reducing repetitive manual writing.
- Automated personalized outreach at approximately **5 emails per minute**, demonstrating practical LLM integration and workflow automation at scale.
- Used the system for real NGO outreach during college activities, applying LLM automation to a real-world communication workflow.

FLUX – AI Energy Prediction Platform | *Python, FastAPI, LSTM, ARIMA, Random Forest, Next.js, MongoDB* Live

- Architected a full-stack machine learning platform serving multiple forecasting models through **FastAPI REST endpoints**.
- Implemented model selection and prediction workflows using **LSTM, ARIMA, and Random Forest**, with MongoDB for historical prediction storage.
- Built a Next.js dashboard consuming backend APIs for interactive energy prediction and visualization.
- Research from the project contributed to an **IEEE co-authored paper on residential energy consumption prediction**.

Khan's Fitness – AI-Powered Fitness Platform | *Next.js, Claude API, Tailwind CSS, GSAP, Framer Motion* Live

- Built and deployed a production fitness platform with membership information, trainer profiles, transformation showcases, lead generation, and AI-powered features.
- Integrated the **Claude API** to generate personalized workout plans, BMI analysis, and diet recommendations using prompt engineering and LLM response handling.
- Developed a responsive production interface with GSAP and Framer Motion and deployed the application on Vercel with performance-focused asset optimization.

DeepCipher Studio – Production Agency Platform | *Next.js, GSAP, Framer Motion, Three.js* Live

- Designed and developed the complete agency platform with reusable components, responsive architecture, interactive WebGL elements, and advanced motion systems.
- Implemented SEO metadata, responsive behavior, performance optimization, and production deployment on Vercel.

Additional Production Work

- **Shingri Developers** – Built and deployed a responsive real estate platform using Next.js, Tailwind CSS, and Framer Motion with reusable property presentation components. [Live Demo](#)
- **Gadag Info** – Built a bilingual Kannada-English community platform using React, Tailwind CSS, and internationalization with reusable components and accessible navigation. [Live Demo](#)

Education

Nitte Meenakshi Institute of Technology Bengaluru (NMIT)

B.E. – Artificial Intelligence & Machine Learning

2023 – 2026

Bengaluru, Karnataka

Government Polytechnic, Gadag

Diploma – Computer Science & Engineering

2020 – 2023

Gadag, Karnataka

- CGPA: **8.59** – First Class with Distinction

Certifications

- Python Programming – Udemy
- Database Management Systems – Infosys Springboard
- Introduction to Machine Learning – Great Learning
